

Linea Group Awarded to G-Cloud 12

News Release

Linea Awarded to the G-Cloud 12 Procurement Framework by the Crown Commercial Service.

Complex Change, Turnaround and Transformation specialists, Linea Group today announced that it has been approved to provide specialist Cloud services under the Crown Commercial Service G-Cloud framework initiative for the 8th consecutive year. The approval means that public sector organisations will continue to be able to procure products and services directly from Linea Group.

In essence, this means Linea Group is trusted by **1,600 public sector organisations**, including 250 local councils covering 30,000 sites.

G-Cloud is a flagship Government scheme, introduced in 2012 to develop a secure, high-performance cloud infrastructure for the Public Sector. The objective is to ease the movement of computing services to the Cloud. Key features include assured security, standard management practices, approved suppliers and easy

access to technology; all aimed at making I.T. cheaper to run.

Linea is pleased to announce the addition of a new Employee Engagement Service to its G-Cloud portfolio.

The **Employee Engagement Portal** is an innovative, pioneering and ingenious application designed to assist Recruitment & Communications professionals to rapidly increase communication reach through the leveraging of untapped networks. Woo harnesses 'The Power of Many' to develop limitless networks which can be utilised to maximise and synchronize information transmission, internally and externally

Linea Group CEO, Ian Chambers said, 'We are once again pleased to be awarded to the latest version of G-Cloud. Linea has now been providing our ever growing portfolio of specialist services to public sector clients through the G-Cloud framework for the last 8 years. Under the framework, we will continue to offer clients quicker & easier access to our services'.

If you would like to find out more about the services we can provide, please contact a member of the team who will be happy to help.
