

# 10 Years for Linea & G-Cloud

## NEWS RELEASE

HM Government  
**G-Cloud**  
Supplier

We are thrilled to announce that Linea has successfully resecured its position as an approved supplier on the G-Cloud Procurement Framework agreement with the Crown Commercial Service. This achievement marks our tenth consecutive year on the framework, underscoring our commitment to providing exceptional cloud-based solutions to the public sector.

G-Cloud is a government-approved procurement platform designed specifically for cloud technology. It enables public sector organisations to procure a wide range of products and services directly from accredited suppliers like Linea, streamlining the acquisition process. Our continued participation in G-Cloud means that our clients can access innovative and reliable solutions to enhance their operations.

The G-Cloud framework operates through the Digital Marketplace, a user-friendly front-end catalogue that helps UK public sector customers easily find and purchase cloud computing services. Its primary objective is to facilitate the transition of computing services to the cloud, making it more efficient and cost-effective. Key features of the G-Cloud framework include:

**Assured Security:** Ensuring that all cloud solutions meet high security standards to protect sensitive

data.

**Standard Management Practices:** Streamlined processes that promote consistency and reliability in service delivery.

**Approved Suppliers:** A carefully curated list of trusted suppliers, guaranteeing quality and performance.

**Easy Access to Technology:** Simplified procurement processes that enable quicker access to essential cloud services, ultimately making IT operations more economical.

As part of G-Cloud 14, we are proud to continue offering our expertise in Project and Programme Management, alongside our Software as a Service (SaaS) solutions. These offerings are specifically designed to support organisations in their implementation and migration to cloud-based services, ensuring they can fully leverage the benefits of modern technology.

We look forward to continuing our partnerships with public sector organisations and helping them achieve their digital transformation goals through the G-Cloud framework.
